The Tree Specialists

Ted Green MBE

Ted Green is passionate about ancient trees. He's a pioneer of the theory that ancient trees were once 'working trees', serving man over many centuries and Founder President of the Ancient Tree Forum. Ted is Conservation Consultant to the Crown Estate, Windsor.

Ted travels across the UK and internationally, giving talks, television and radio interviews, which challenge the view that ancient trees are useless relics of the past, not worth caring about. He argues that they are gene banks, reservoirs of disease and pest resistance in a similar fashion to old races of our commercial crops that we constantly have to return. Ted also promotes the more enlightened view that they should be regarded as historic living monuments.

…..and a passionate advocate of modern arboriculture
